

SpringTerm 21st January 2022 Our Value of the month is Determination

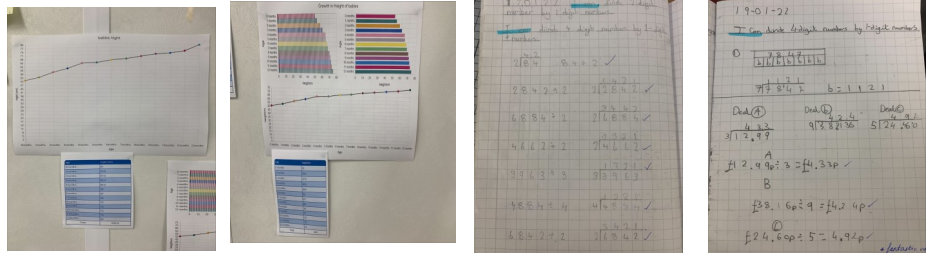

Diary Dates

11.02.22	End of Term
21.02.22	Children return
22.02.22	Happy Bags Collection
14.03.22	Parents Evening
16.03.22	Parents Evening
18.03.22	Red Nose Day
01.04.22	Break Up
19.04.22	Children back
12.05.22	Class Photos
16.05.22	Happy Bags Collection
27.05.22	Break Up
07.06.22	Children Back

This week in year 5 we have started looking at division in maths. We have learnt about different methods to divide bigger numbers and found the most efficient way is using the “bus stop” method.

The children have worked with increasingly large numbers and are doing a super job! They have all realised how important it is to know their timetables to help them. To support them with this you could encourage them to play games online such as “hit the button” and “wall multiplication.”

In Science we looked at the growth of babies and what the average growth would be through the first year of their lives. The children were very surprised to know how quickly a baby grows in height. We also identified what else is measured at birth and then at check-ups throughout the babies first year. The children used ‘Purplemash’ to plot the data and created different graphs to present this.

Key Stage 1 thoroughly enjoyed their WOW day introduction to our Amazing Africa Topic last week.

They tasted the fruits listed in the African tale ‘Handa’s Surprise’, found Africa on a world map and created a traditional African necklace. The children were brave and all tried new things. Penguin class then wore their necklaces and had a go at doing the jumping dance – a traditional dance of the Maasai tribe.
